REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:
2. Claims 20 and 23 both claim a method for starting and normally operating a fuel reforming apparatus which comprises a reformer, a water vaporizer, a shift converter, a CO remover and a fuel gasifier. The claimed procedure comprises burning a startup fuel without the supply of primary fuel to the reformer, and heating up the shift converter and the CO remover. The prior art teaches such a startup procedure. However, the prior art neither teaches nor suggests, that after completion of the startup procedure, the combustion gas from the burned fuel is heat exchanged with a fuel gasifier, a water vaporizer and fuel in the reformer and is controlled into a temperature level of reaction in the shift converter and the CO remover. The closest prior art (US 6,413,479) teaches controlling the amount of combustion gas that is produced in order to regulate the temperature of the shift converter and CO remover, but does not teach or suggest controlling the temperature of the combustion gas to the level of reaction in the shift converter or CO remover.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
